# Abstract

This document is a short example of how to use this template to write your own thesis. It gives a brief summary of the most important aspects and options that define this template.

# 1 General

There are 2 different class files available: syssec-report and syssec-thesis.

# 2 Chapters and Sections

This is an example of a numbered chapter. The section number increases automatically and does not need to be stated. To use a unnumbered section (a.k.a. a special section), just use `\section*` {`Name of unnumbered chapter`}. The hierarchy is chapter → section → subsection → subsubsection → paragraph.

## 1 Section

You guessed it, this is one of those infamous *sections*.

### 1.1 *Subsections*

This is a numerated `\subsection`. There is also a `\subsubsection` command. To create an unnumbered subsection, just add * like needed for sections.

#### 1.1.1 *Subsubsection*

And while we're at it, here's a sub-sub-section for you!

**A PARAGRAPH**

is you! But there are no dragons, sorry about that.

# 3 Imports, Media, Floats and Then Some

Large, theses like master theses, and dissertations often get very confusing when written in single document. You can import other .tex files with the `\include{other-latex-file.tex}` command. The style is inherited from the master file and the sections, figures, tables, footnotes, citations, etc. are integrated in the context of the master file.

## 1 Tables and Figures

In LaTeX you can use tables and figures which will be automatically added to the List of Tables and List of Figures after the Table of Contents.

### 1.1 *Tables*

| Quantile | 0.05 | 0.1 | 0.25 | 0.5 | 0.75 | 0.9 |
|---|---|---|---|---|---|---|
| | $-1.644$ | $-1.281$ | $-0.674$ | $0.000$ | $0.674$ | $1.281$ |
| | $-1.644$ | $-1.281$ | $-0.674$ | $0.000$ | $0.674$ | $1.281$ |
| | $-1.644$ | $-1.281$ | $-0.674$ | $0.000$ | $0.674$ | $1.281$ |

Table 3.1: Example of a table

### 1.2 *Figures*

Figures should be vector graphics where possible. LaTeXcan parse PDF and EPS out of the box but SVG can also be used with the svg package. If no

vector graphics are available and you need to include raster graphics like JPEG, PNG, or BMP, make sure you have a high resolution and high DPI image. Note that the resulting PDF file can be very large when using a lot of raster graphics.

# 5 BibTeX and Footnotes

Every thesis contains references. With BibTeX[1] you can easily define them in one or more files and load them with LaTeX and cite them at any time.
